House of Journeys

Multi-Chain Smart Contracts

EIP-2535 Diamond pattern contracts across 8 blockchains. NFTs, DeFi, hedge funds, and launchpad.

🔗 MULTI-CHAIN

🚀 SEED ROUND

Upgradeable modular architecture deployed simultaneously across 8 chains.

ETH, Base, Pearl, Diamond + 4 more — shared infrastructure, unified liquidity.

Why Existing Infrastructure Fails

Rigid Smart Contracts

Most NFT and DeFi contracts are non-upgradeable. Bugs require full redeployment and costly migration.

Chain Fragmentation

Projects deploy on one chain and miss liquidity on others. Multi-chain is complex without shared infrastructure.

Static NFT Mechanics

PFP collections with no utility. No breeding, no time-based dynamics, no on-chain evolution.

Bolted-On DAO Governance

Most DAOs are Snapshot votes — no on-chain execution, no treasury management.

One Architecture. Eight Chains. Full Stack.

House of Journeys deploys EIP-2535 Diamond pattern contracts on 8 chains simultaneously — upgradeable, modular, and production-ready.

Core Facets

- **TatumMintFacet** — Breedable NFT minting
- **BreedingFacet** — Genetic trait inheritance
- **TimeTurtleFacet** — Time-based NFT dynamics
- **CountsTurtleFacet** — Count-based NFT mechanics
- **LibDiamond / LibTurtle / LibBreeding** — Full library suite

1

40% — Engineering

New facets, cross-chain bridges, launchpad contracts
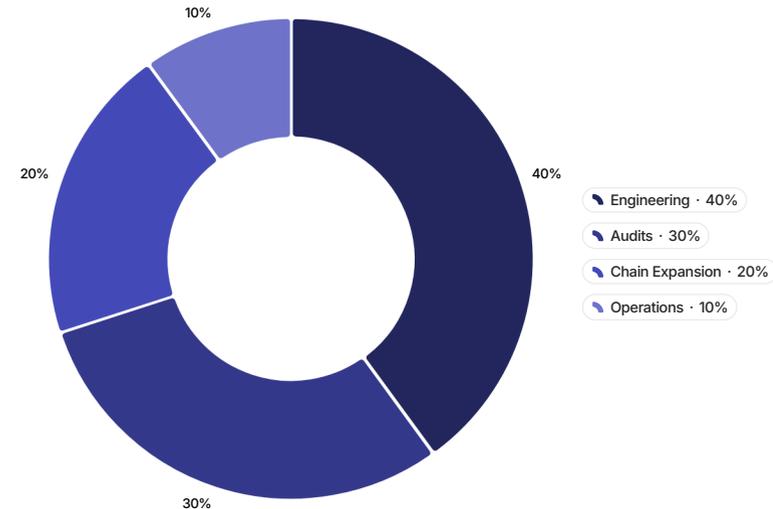

2

30% — Audits

Professional smart contract security audits for all 8 chains

3

20% — Chain Expansion

Gas fees, RPC infrastructure, chain-specific integrations

4

10% — Operations

Legal, DAO governance setup, compliance
